

Training Stand

Teaching the stand is a very important behavior to teach a dog.
It is important for a veterinary examination, a tick check and grooming.

1. Get your dog in a sit with a yummy treat on the nose.

2. Take a small step forward and move the treat forward keeping it level with the dog's nose.

3. Click or say "Yes" when four feet are on the ground and deliver about three treats to keep the dog in position for a short time.

Put the treat between the index and middle fingers in front of the dog's nose to make your lure hand like the final signal.

Remember do not give a verbal cue such as saying "Stand" till you are 100% sure your dog can do the behavior!
